Bar Glass Washing and Sanitizing

Low Suds Automatic

Low Foam Bar Glass Washing Detergent for Automatic Brushes

The professional's choice for manually washing all types of glassware in bars, taverns and other foodservice glass washing operations. Contains special low foaming surfactants, descaling and sheeting agents for complete, spot-free cleaning of glassware. Ideal for use with automatic bar glass washers with electric brushes. Very low foaming.

4x1 gal. case

#18041

High Suds Manual

High Sudsing Glass Wash for Manual Cleaning

A mild, superior quality detergent for cleaning glassware in bars, taverns and restaurants. Designed for hand washing or stationary brushes in the first sink of a three sink system. Formulated with an advanced blend of surfactants and sheeting additives for sparkling clean, streak-free glassware. Produces a stable foam that cuts through soils and scale.

4x1 gal. case

#18141

Low Foam Bar Glass Wash

Powdered Glass Washing Detergent For Electric Brushes

Powdered detergent for superb cleaning performance on all types of glassware in bars, taverns and other foodservice operations. Contains special low foaming surfactants, descaling and sheeting agents for complete, spot-free cleaning of glassware. Ideal for use with automatic bar glass washers with electric brushes. Assures sparkling results.

Last Sink Sanitizer

Powdered Bar Glass Sanitizer

An EPA registered sanitizer for use in restaurants, bars institutional kitchens and food handling and process areas. Designed for use on glassware, silverware, dishes and other mobile food contact items. May also be used to sanitize counters, tables, food preparation equipment, trays, sinks and other immobile items. Provides 100 ppm available chlorine when diluted as directed with a minimum two minute contact time.

100x¼ oz. case

#18925

QuatSan

Food Contact Sanitizer for Restaurants, Bars, Food Processing

An EPA registered no-rinse sanitizer, disinfectant, cleaner and mildewstat for use in restaurants, bars, institutional kitchens, and food handling and process areas. Red colored product imparts slight color tint in solution to assure use. May be used at a variable dilution rate of .75 - 2 oz. per 4 gallons of water (150-400 ppm active quat). Also excellent for food processing equipment, dairy processing equipment, utensils and other hard, nonporous food contact surfaces. Effective against a multitude of listed organisms.

#18405

Iso-Phor

Iodine Cleaner-Sanitizer for Restaurants and Food Service

An EPA registered iodine-based sanitizer for use in restaurants and other food service institutions. Designed for sanitizing glasses, dishes, food storage areas and other food contact surfaces. Low foaming. Excellent for sanitizing bar glassware in automatic glass washing machines. Used at 1 oz per 5 gallons with a 1 minute immersion time, followed by air drying with no subsequent water rinse. Provides 25 ppm titratable iodine when diluted.

2x1 gal. case

#18621

Beer Line Maintenance

Beer Line Cleaner

Low Foam Alkaline Detergent for Cleaning Draft Beer Lines

A chelated caustic detergent which helps eliminate bio-film, yeast residue, hop resins, bacteria, mold, sugar and protein build-up that accumulate in porous polymer beer tubing. Assures clean draft lines and consistently flavorful beer. Contains a blue dye indicator to assure complete flushing and chemical neutralization. Meets the standards for beer line detergents established by the Brewer's Association. Low foaming and highly concentrated.

Beverage Equipment Cleaning

Rip Tide

Low Foaming Alkaline CIP Detergent for Breweries and Food Plants

High alkaline detergent for low foam CIP cleaning of machinery, tanks, pipelines, kettles, fermenters, conditioning tanks and other hard surfaces in breweries, meat and poultry plants, seafood plants, dairies, canning operations, bottling facilities and many other types of food processing plants. Very low foaming for easier rinsing and reduced pump cavitation. Removes baked on grease, oil, carbon, protein, fats, sugars, carbohydrates and other difficult soils quickly and effectively. Also excellent for soak and immersion cleaning.

#93105
#93155

Brilliant

Low Foam CIP Acid Blend for Stainless Steel Passivation

A powerful blend of phosphoric and nitric acids formulated to passivate and brighten stainless steel tanks, transfer lines, kegs and other stainless surfaces. Removes spots, deposits and micro-films of iron oxide (rust), foreign matter, beerstone, oxalates and other inorganic desposits from tank surfaces. Prevents these contaminants from leaching iron ions into beer, wine or other beverages and negatively affecting quality and taste. Leaves stainless surfaces sparkling with a passivation layer of chromium oxide. Low foaming formulation for use in CIP, manual or soak cleaning processes.
