HardChlor™

Powdered Machine Dish Detergent

A premium quality, high performance machine dish detergent for use in high or low temperature dishmachines. Designed for bulk feed dispensers or manual feed into dishmachine. Heavily fortified with alkaline builders, soil emulsifiers, water conditioning and anti-redeposition agents, along with special destaining ingredients. Also contains special polymer additives for outstanding results in hard water areas. Delivers outstanding results on glassware, silverware, coffee cups, etc. Not recommended for use on aluminum or other soft metals (such as pewter, tin, zinc, brass, or copper).

Directions for Use

HardChlor is designed to be dispensed with equipment installed and/or approved by your Service Representative, who will determine the correct concentration based on your operating conditions. Good dishwashing requires proper temperatures, correct procedures, proper chemical injection and mechanical action by the dishmachine. Your Service Representative will review these requirements during regular service calls.

Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Technical Specifications

Appearance	White Powder
Odor	Chlorine
