

Product Bulletin

LowTemp Rinse Additive

A high quality rinse additive/drying agent formulated for use in low temperature commercial dishwashing machines using a chlorine sanitizer. **LowTemp Rinse** helps eliminate water spotting and produces fast drying of machine washed items. Eliminates the need for towel drying (a health code violation in most areas), which is time consuming, costly and contributes to dish breakage. Contains foam control agents and polymer water conditioners.

Directions for Use

This product is designed to be dispensed with equipment installed and/or approved by your Service Representative, who will determine the correct concentration based on your operating conditions. For normal applications, this product should be injected into the final rinse water of the dishmachine at a concentration of 50 to 100 ppm. The amount required and the rinsing and drying performance will be affected by water hardness and rinse water temperature along with the dishmachine's mechanical action. Your Service Representative will review these factors during regular service calls and will make adjustments as needed to produce good results.

Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Technical Specifications

Appearance	Dark Blue Liquid
Odor	Characteristic
Alkalinity (as NaOH)	None
pH (1% solution)	>7.0
Foaming	None
Flash Point	>200°F
Bulk Density	approx. 8.50 lbs./gal.
Solubility in Water	100%
Rinsing	Excellent
Chlorine Content	None
Phosphorous as P ₂ O ₅	None
Hard Water Performance	Very Good
Freeze/Thaw Stability	Excellent

Package Size

Product Code

4x1 gal. case	#15541
5 gal. pail	#15505
