

## Product Bulletin

# OxyBright

## High Performance Oxygenated Stain Remover

An advanced, organic product which removes stains and odors safely and effectively from a variety of surfaces:

**China and Plastic** - Removes tea, coffee, cola and food soil stains from coffee cups, coffee makers, plates, bowls, and plastic kitchen ware and utensils.

**Laundry** - Boosts cleaning performance on all types of fabrics. A color-safe alternative to chlorine bleach. Excellent as a presoak for stubborn soils.

**Carpeting and Upholstery** - Effective on stains from wine, juice, pets, etc.

**Hard Surface Cleaning** - For non-porous hard surfaces in restrooms and kitchens. Provides deep cleaning on tile, grout, floors, walls and many other areas.

### Directions for Use

\*1 ounce scoop enclosed in bottle\*

**Removing stains from china and plastic** - To remove stains on coffee cups, plates, bowls, plastic kitchenware and plastic utensils, dissolve 2-4 ounces per gallon of hot water. Soak items in solution for 30 minutes or longer if needed to remove stains (overnight if necessary). Wash in dishmachine to rinse and sanitize.

**Removing stains from coffee makers** - Prepare a cleaning solution by dissolving 2-4 ounces per gallon of hot water. Circulate solution through coffee maker for 10 -15 minutes, then rinse with clean water.

**Laundry booster** - Add approximately 2-4 ounces to a standard wash load for improved color-safe whitening and brightening of all fabrics.

**Removing stains from carpeting and upholstery** - Prepare a ready-to-use solution by dissolving ½-1 ounce in a quart of hot water. Test for colorfastness by applying solution to an inconspicuous area and allowing to dry. Blot (do not wipe) stain to remove excess. Apply solution to stain and allow to stand for 10 -30 minutes. Rinse with fresh water, then blot up excess liquid.

**Cleaning hard surfaces** - Dissolve ½-1 ounce per quart of hot water. Apply solution to surface to be cleaned, let stand 10-30 minutes, then rinse completely with clean water. To clean and brighten tile and grout, add a small amount of water to **OxyBright** to create a paste. Apply to surface, let stand for 30-60 minutes, then rinse completely with clean water.

### Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

### Technical Specifications

Appearance	White Powder
Odor	Citrus
Alkalinity (as NaOH)	None
pH (1% solution)	>11.0
Foaming	Moderate
Flash Point	NA
Bulk Density	approx. 9.00 lbs./gal.
Solubility in Water	100%
Rinsing	Complete
Chlorine Content	None
Phosphorous as P <sub>2</sub> O <sub>5</sub>	<10.0%
Hard Water Performance	Excellent
Freeze/Thaw Stability	NA

### Package Size      Product Code

2x8 lb. case      #11828
