

## Product Bulletin

# PowerClean

*High Performance  
Pressure Wash Detergent*

A high strength alkaline detergent formulated to clean trucks, buses, automobiles, forklifts, and other commercial vehicles through pressure washing equipment. **PowerClean** contains solvents, alkalis, and a proprietary blend of synergistic surfactants which penetrate and dissolve road soils, and hold them in suspension for free rinsing. Effectively removes grease, grime, and road film rapidly and completely. Moderate foam levels provide increased contact time on vertical surfaces and improved cleaning performance.

### Directions for Use

Prior to use, test this product in an inconspicuous area to assure compatibility with surface. **PowerClean** should be used at a dilution rate of 20-40:1 (3-6 ounces per gallon of water), depending on the soil level, water temperature and hardness, and amount of pressure (psi) being used. Apply solution to dry vehicle surface--do not prewet. Allow 2-5 minutes contact time to penetrate and dissolve soils. Rinse with hot, high pressure water (1,000 psi or greater). Do not allow solution to dry on vehicle surface, especially glass, magnesium, or aluminum.

### Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

### Technical Specifications

Appearance	Clear Liquid
Odor	Characteristic
Alkalinity (as NaOH)	Moderate
pH (1% solution)	>12.0
Foaming	High
Flash Point	>200°F
Bulk Density	approx. 8.90 lbs./gal.
Solubility in Water	100%
Rinsing	Very Good
Chlorine Content	None
Phosphorous as P <sub>2</sub> O <sub>5</sub>	None
Hard Water Performance	Excellent
Freeze/Thaw Stability	Complete

### Package Size      Product Code

5 gal. pail	#85505
55 gal. drum	#85555
