

Product Bulletin

Solid DryStar

All Temp Rinse Aid

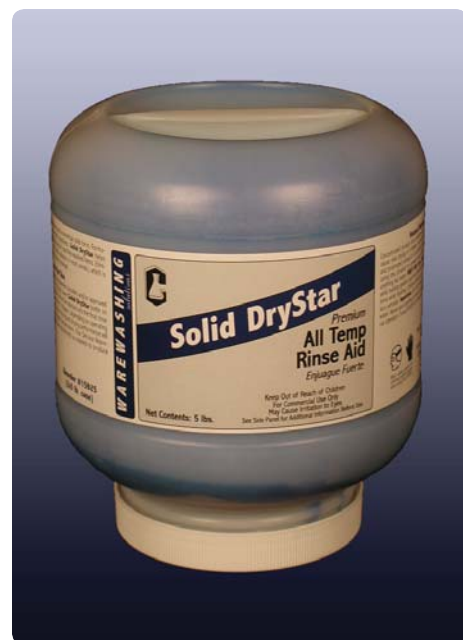

A premium quality rinse additive in convenient and economical solid form. Formulated for use in high or low temperature dish machines. **Solid DryStar** helps eliminate water spotting and produces fast drying of machine-washed items. Eliminates the need for towel drying (a health code violation in most areas), which is time consuming, costly and contributes to dish breakage.

Directions for Use

Solid DryStar is designed to be dispensed with equipment installed and/or approved by your Service Representative. Remove cap and invert capsule on proper solid bowl dispenser. If a screened cap is present, remove the outer lid only, not the screen. This product should be injected into the final rinse water of the dish machine at an approximate concentration of 100 ppm, depending on operating conditions. The amount required and the rinsing and drying performance will be affected by water hardness and rinse water temperature. The Service Representative will review these factors and make adjustments as needed to produce good results.

Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Technical Specifications

Appearance	Blue Solid
Odor	Characteristic
Alkalinity (as NaOH)	None
pH (1% solution)	approx. 6.0
Foaming	Very Low
Flash Point	None
Bulk Density	approx. 10.00 lbs./gal.
Solubility in Water	100%
Rinsing	Complete
Chlorine Content	None
Phosphorous as P ₂ O ₅	None
Hard Water Performance	Excellent
Freeze/Thaw Stability	NA

Package Size Product Code

2x5 lb. case

#15925
