

## Product Bulletin

# Solid SilverStar

## Enzyme Fortified Silver Presoak

A premium quality warewashing product for use in restaurants, cafeterias, and other institutional foodservice operations. Penetrates and softens tough food soil deposits on flatware, dishware, pots, pans, etc. prior to machine or manual warewashing. Fortified with enzymes for effective removal of stubborn protein-based food soils such as egg, pasta, gravies, sauces, etc. Detarnishes silver plated silverware with electrolytic action when used with aluminum foil in a presoaking container. Increases the efficiency of warewashing by improving soil removal and reducing rewashes. Assures sparkling clean results. An essential product for a quality warewashing program. Fresh mint fragrance.

### Directions for Use

This product is designed to be dispensed with equipment installed and/or approved by your Service Representative. Remove cap and invert bottle onto a solid bowl dispenser. Consult your Representative for information on equipment setup and procedures for use. For best results, use with hot water, soak items for 10 minutes or longer, change solution frequently and soak before food soils dry to maximize penetration and removal. Wash immediately after soaking, first by laying silverware flat in an open rack (first wash), then by sorting into cylinders, handles up (second wash).

**Detarnishing silver plate:** Immerse utensils into presoaking solution with a piece of aluminum foil. Allow to soak for at least 10 minutes before washing as usual.

### Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

### Technical Specifications

|  |                         |
|--|-------------------------|
| Appearance                                   | Green Solid             |
| Odor   | Mint                    |
| Alkalinity (as NaOH)                         | Moderate                |
| pH (1% solution)                             | <10.0                   |
| Foaming                                      | High                    |
| Flash Point                                  | NA                      |
| Bulk Density                                 | approx. 12.00 lbs./gal. |
| Solubility in Water                          | 100%                    |
| Rinsing                                      | Complete                |
| Chlorine Content                             | None                    |
| Phosphorous as P <sub>2</sub> O <sub>5</sub> | <4.0                    |
