SpectraChlor™ Multi-Purpose Chlorine Additive

SpectraChlor is a versatile chlorine additive for use in a variety of institutional and industrial applications. Ideal for use in low temperature dishmachines. May be used for cleaning non-porous food contact surfaces, such as glassware, utensils, and dishes as well as food mixing, handling and processing equipment. Also a terrific cleaner and deodorizer for most kitchen and bathroom surfaces, such as floors, walls, fixtures, etc. An effective whitener and brightener for laundering and stain removal from colorfast fabrics.

Directions for Use

For Low Temperature Dishmachines and Non-Porous Food Contact Surfaces:

A solution of 100 ppm available chlorine may be used if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that available chlorine does not drop below 50 ppm. Prepare a 100 ppm solution by thoroughly mixing 1.2 ounces of **SpectraChlor** with 10 gallons of water. If no test kit is available, prepare a solution by thoroughly mixing 2.5 ounces with 10 gallons of water to provide approximately 200 ppm available chlorine by weight.

Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the solution, maintaining contact for at least 2 minutes. If solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment and do not soak equipment overnight.

Cleaning and Deodorizing Hard Surfaces in Kitchens and Bathrooms: Assure that surfaces are colorfast and will not be harmed by chlorine. Dilute approximately 1-2 ounces of this product per gallon of water. Apply to surface with a mop, sponge or rag. Allow a few minutes dwell time to penetrate and dissolve soils. Agitate to facilitate soil removal. Rinse completely with clean water.

For Laundry Use: To whiten and brighten colorfast cotton, linen, nylon, dacron, orlon, and rayon, use ½ cup of **SpectraChlor** per wash load in top loading machines, or ¼ cup in front loading machines. Add to presoak, wash water or first rinse. Do not pour directly onto fabric. For removal of stubborn stains (grass, coffee, fruit, berry, etc.), mix 1-2 ounces to one quart of warm water in a glass container (not plastic). Immerse fabric for 5-10 minutes. Rinse completely. Repeat if necessary. Wash as usual.

Note: Like all chlorine products, **SpectraChlor** degrades with age. Use a chlorine test kit and increase dosage as necessary to obtain the required level of available chlorine.

Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Technical Specifications

Appearance	Yellow-Green Liquid
Odor	Chlorine
Alkalinity (as NaOH)	High
pH (1% solution)	>10.0
Foaming	None
Flash Point	None
Bulk Density	approx. 9.10 lbs./gal.
Solubility in Water	100%
Rinsing	Good
Chlorine Content	>5.0%
Phosphorous as P ₂ O ₅	None
Hard Water Performance	Moderate
Freeze/Thaw Stability	Moderate

Package Size	Product Code
4x1 gal. case	#14941
5 gal. pail	#14905
15 gal. drum	#14915
