

Product Bulletin

Work Horse™ Metal Safe Foaming Chlorinated Degreaser

A metal safe high foaming chlorinated detergent which provides deep cleaning of all hard surfaces in meat and poultry plants, dairies, food processing facilities, farms, and many other applications. Produces abundant clinging foam which adheres to vertical surfaces, thus increasing contact time and cleaning performance on walls, tanks, machinery, equipment, floors, countertops, etc. Fortified with chlorine for improved cleaning and deodorizing performance. Safer to use on aluminum, galvanized and other non-ferrous metal surfaces than caustic-based degreasers. Rapidly attacks and dissolves fats, oils, starches and other protein-based soils as well as grease and grime. Ideal for use with foam-generating equipment, pressure washers and steam cleaners. May also be used with manual brushing or soak cleaning procedures. Non-flammable and biodegradable.

Directions for Use

Test product in an inconspicuous area before use to assure compatibility with surface. For normal cleaning requirements, dilute 4-8 ounces of **Work Horse** per gallon of hot water. Increase solution strength if required by very heavy soil deposits. Apply solution at low pressure to surface to be cleaned using a foam generator or pressure washer. Allow solution several minutes to remain on surface to penetrate and dissolve soils. Agitate with a brush or sponge to improve soil removal, then rinse completely with clean water. A subsequent application of no-rinse sanitizer may be required by local health authorities.

Safety Reminder

Prior to using this or any cleaning product, make sure employees read and understand the hazard information found on the product label and Material Safety Data Sheet (MSDS). The label and MSDS will also provide information on handling precautions, protective equipment and first aid instructions which might be appropriate for this product.

Technical Specifications

Appearance	Light Yellow Liquid
Odor	Chlorine
Alkalinity (as NaOH)	Low
pH (1% solution)	>10.0
Foaming	High
Flash Point	>200°F
Bulk Density	approx. 9.60 lbs./gal.
Solubility in Water	100%
Rinsing	Good
Chlorine Content	<5.0%
Phosphorous as P ₂ O ₅	None
Hard Water Performance	Good
Freeze/Thaw Stability	Moderate

Package Size Product Code

5 gal. pail	#93705
55 gal. drum	#93755
