Quart Boxes with Panel Silk Screening

Private Labeling

We are proponents of distributor brand development, and believe strongly in helping our customers establish a market identity through quality private labeling. For this reason, we offer several options for labeling our products, each with their own unique advantages:

Universal Labels

This is our most popular method of private labeling. It is available for all products and package sizes except quarts, solids and EPA registered germicides. The two-color Universal Label has no setup costs and no minimum order requirements. It provides a quick, easy system for distributors to sell products displaying their own semi-custom labels, which include their logo, address and other company information. Universal Labels are color-coded to match product colors as closely as possible.

Custom Labels

This option is available when a distributor prefers a label that is distinctly his own. It is available for all products and package sizes except quarts. Our graphic arts department can assist in developing a label design and layout that incorporates the distributor's logo or other artwork. Once labels have been printed, there is no minimum order requirements. Initial printing costs apply.

Silk Screening

This is a label that is "painted on" using highly durable and resistant inks. This process is available for liquids packaged in quarts, gallons and pails, as well as for powders or solids packaged in pails, bottles, jars or boxes. Silk screening is the most durable labeling method in the industry. The inks used are impervious to water, heat or other factors that often cause paper labels to peel or fall off. Our graphic arts department can assist in developing a label design and layout that incorporates the distributor's logo or other artwork. Initial setup costs apply (usually \$45.00 to \$65.00 per screen). Minimum production quantities are as follows:

- Liquids:** 20 cases or pails per product; 40 cases for 2x1 gal. or 6x1 qt.
- Solids:** 20 - 4x cases or 40 - 2x cases per product
- Powders:** 20 - 4x cases, 40 - 2x cases, or 20 pails per product

Special rules and restrictions apply to private labeling EPA registered germicides. Consult your sales representative or customer service for more information.

Sales & Service Materials

We offer a portfolio of support materials designed to assist our customers with their ongoing efforts to sell and service our products. The most important of these are the **Product Bulletins**, which provide detailed information about product features, uses and specifications. Bulletins for all of the products listed in this Catalogue are now available for easy access and downloading at our website, www.crown-chem.com. We also offer **Product Flyers** for select product groups. Flyers highlight the benefits of a specific group of related products, such as warewashing solids or laundry stain removers. Service items such as **Wall Charts** are available for machine dishwashing, manual dishwashing, dishmachine deliming, and as part of the ControlChem™ line. All charts feature full color graphics and photographs as well as bilingual instructions and/or guide words. Other service items such as **Test Kits**, **Service Reports** and **Survey Forms** are also available. For select products we also offer color and number coded **Secondary Labels** (for spray bottles) and **Dispenser Decals** for reduced product confusion and misuse.

Many of our sales and marketing tools can be customized for large volume applications. Please contact us for more information about complete chemical marketing programs.

Sales Information

Sales Training & Support

Our Regional Sales Managers have many years of on-site field experience in foodservice, hospitality, laundry, janitorial, institutional and industrial accounts. They are more than capable of assisting distributors at their accounts with issues relating to product selection, recommended usage, cleaning procedures, equipment installation and setup, technical matters and much more. We also provide sales and training meetings for Distributor Sales Representatives.

Product Inventory

Crown's extensive line of **Standard Formulations** is set forth in this Catalogue. Many of these products--but not all--are maintained in our inventory for faster order turnaroud. Standard Formulations which are not routinely kept in stock may be subject to a minimum order requirement. Please contact us if you have any question about the stock availability of a specific product.

We also offer **Custom Formulations** to meet specific performance or packaging specifications. Our computer database contains hundreds of special formulas developed over the years to address special requirements. We may already have what you are looking for, but if not, there's a good chance we can create it. The minimum order requirement for Custom Formulations varies by product type and complexity. Please contact customer service for more information.

Laboratory Analysis

We have extensive experience in developing products to meet specific performance requirements or to match competitive items. For thorough analysis, please submit a sample of the product (minimum 1 pint for liquids, 1 lb. for powders or solids) along with any available supporting information--product label, MSDS, data sheet, etc. Custom Formulations carry minimum production requirements which vary according to the type or product and its packaging. Please contact customer service for additional information.

Drop Shipments

Drop shipments directly to end users are available on a blind bill of lading. For drop shipments below \$100.00 in invoice cost (exclusive of shipping costs), a \$15.00 handling charge will be assessed per unit (case, pail, etc.)

Credit Accounts

Credit is extended to distributors that have provided credit information and demonstrated credit worthiness. Terms on preapproved credit accounts are net 30 days. Failure to pay invoices according to terms may result in delayed processing of orders and/or cancellation of credit terms. A fee of \$25.00 will be assessed for checks which are returned NSF.

Product Returns

Product returns are subject to prior approval. Private labeled products are non-returnable unless defective. Merchandise more than one year old is non-returnable. Authorized returns are subject to a 20% restocking charge.
