

ALUMASOAK™

Heavy Duty Soak Tank Detergent for Grease and Baked-On Carbon

Formulated to remove stubborn deposits of built-up grease and baked-on carbon from aluminum kitchen utensils, pots and pans, fryer baskets and trays, as well as removable parts from grills, stoves, barbecues, exhaust fans, hoods, and filters. Provides excellent cleaning performance while being safe on many types of metals. Fortified with a powerful blend of alkalis and builders for unsurpassed penetration and removal of difficult soils. Non-fuming and non-flammable. Safe for use on aluminum. Lighter metal alloys such as tin may etch if soaked for more than one hour. Not recommended for use on items that are painted, varnished or have Teflon surfaces.

Directions for Use

Wear rubber gloves and chemical splash goggles at all times when using this product. Avoid splashing. Add the entire contents of one bottle (8 lbs.) into approximately 10 gallons of warm or hot water. Continue filling with water to the fill capacity of the soaking vessel (typically about 30 gallons). Dissolve powder by raising and lowering the soaking basket. Load utensils, pots, pans, etc. into vessel, then soak for 1-6 hours depending on the soil level. For very stubborn stains or baked-on carbon deposits, overnight soaking will be needed. For extreme cases, soak and rinse items repeatedly for the entire day. Once items are clean, wash in a three compartment sink or process through dishmachine. Consult your Service Representative for more information.

Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's can be downloaded from www.crown-chem.com.

Technical Specifications

Appearance	White Powder
Odor	Characteristic
pH (1% solution, 22°C)	> 10.0
Foaming	Moderate
Flash Point	NA
Density (lbs/gal, 22°C)	9.00 ± 0.1
Stability Range	30-120°F
Free Alkalinity (as Na ₂ O)	High
Solubility (in H ₂ O, 22°C)	100%
Phosphate Content (as P)	< 3.0%

Product Number

17928

Packaging

2x8 lb. case
