

ENFORCE™

Oven & Grill Cleaner

A powerful aerosol cleaner which dissolves tough deposits of built-up grease and carbon on fryers, grills, stoves, exhaust fans, hoods, filters and barbecues. Fortified with high concentrations of solvents, surfactants, and powerful alkalis for excellent penetration and removal of stubborn soils. Foaming formula extends contact time and cleaning performance on vertical surfaces. Not recommended for use on aluminum, tin, pewter or other non-ferrous or galvanized metals.

Directions for Use

Scrape heavy food deposits from surface to be cleaned. Heat oven or grill to about 150-180°F--do not heat above 200°F as violent splattering may occur. Turn off all pilot lights or electric switches before using this product. Shake can, then hold upright and point away from face. Spray product inside of oven from a distance of 8-12", coating evenly. After spraying all surfaces, allow 30 minutes contact time to penetrate and dissolve soils. Scrub with a rag, sponge or brush. Use a non-abrasive pad for stubborn soil deposits. Flush surfaces with potable water. Heat oven to 400°F for 10 minutes before using for cooking food again.

Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's may be downloaded from www.crown-chem.com.

Technical Specifications

Appearance	Colorless Liquid
Odor	Characteristic
pH (1% solution, 22°C)	>10.0
Foaming	High
Flash Point (Propellant Estimated)	-156°F
Density (lbs/gal, 22°C)	Not Available
Stability Range	40-100°F
Alkalinity (as Na ₂ O)	Very High
Solubility (in H ₂ O, 22°C)	100%
Phosphate Content (as P)	None

Product Number

07218

Packaging

6x18 oz case
