FabriChem™

Next Generation Laundry System

Break

Alkaline pH Booster

Premium heavy duty alkaline booster formulated to dissolve grease soils in demanding industrial and institutional on-premise laundries. Contains highly-concentrated alkalis which penetrate and dissolve greasy soils and stains. Boosts the cleaning power of laundry detergent. Safe for use on most laundry washable fabrics, including cotton and synthetics. Not recommended for use on wool, silk, or other delicate fabrics. Not for home use.

Directions for Use: Pre-sort laundry before washing. Presoak and/or treat fabric with stain removers as needed. Your Service Representative will determine the proper amount of this product to be used based on the soil level, fabric type, load size, water conditions, and other variables. In general, use 1 to 2 ounces per 50 lbs. of load size for normal soil levels and conditions. An alkaline neutralizer or souring agent should be injected during the final rinse cycle to restore the fabric's pH to 5.5-6.5.

- ***The most concentrated laundry chemistry in the industry ... one 1½ gal. bottle = approx. one 5 gal. pail of standard products***
- ***Closed-loop dispensing virtually eliminates chemical contact and ensures consistent product delivery and results***
- ***Reduces plastic waste disposal by over 600% ... Far less environmental impact and carbon footprint***
- ***Formulated to deliver outstanding results and lower costs in hospitality, healthcare and other on-premise laundries***
- ***Improved fabric cleanliness, brightness, softness and stain removal for fewer rewash loads***
- ***Smaller containers with convenient grip that hangs on a wall and are easier to handle***

TECHNICAL SPECIFICATIONS

Appearance	Colorless Liquid
Odor	Characteristic
pH (1% solution, 72°F)	>12.0
Foaming	None
Flash Point	>200°F
Bulk Density (lbs/gal, 72°F)	12.05±0.1
Stability Range	50 - 100°F
Free Alkalinity (as Na_2O)	Very High
Solubility (in H_2O, 72°F)	100%
Phosphate Content (as P)	None

PRODUCT NUMBER

FC01215
FC01015
FC01055
