# FOAMING ACID TUNNEL WASH™

## High-Foaming Cleaner-Descaler for Car Wash Tunnels & Equipment for Tunnel & In-Bay Car & Truck Washes

A premium quality acidic detergent designed for use in car washes. Ideal for use on tunnel floors, walls, ceilings, equipment and more. Produces abundant clinging foam which adheres to vertical surfaces, thus increasing contact time and cleaning performance. Ideal for use with foam generating equipment. Also an excellent cleaner for ceramic and quarry tile, stone and porcelain. Provides deep cleaning and brightening of tile surfaces and grout lines. Penetrates and dissolves accumulated mineral deposits, soap scum, oil, grease, uric salts and other soils without harming surfaces. High foaming action clings to shower walls, backsplashes, dividers, etc. Excellent for kitchens, shower rooms, locker rooms, and any other area where tile surfaces must be thoroughly cleaned.

### Directions for Use

Test product in an inconspicuous area before use to assure compatibility with surface. For normal applications, dilute 8-12 ounces of this product per gallon of warm water. Foam generating equipment is recommended for application on walls, ceilings, wash equipment or other vertical surfaces. Follow equipment manufacturer's directions for application procedures. For floors, apply solution liberally to surface with a mop, sponge or rag. Scrub or agitate with a mop, sponge or deck brush to improve soil removal. Allow solution several minutes to remain on surface to penetrate and dissolve soils. Rinse away solution with a clean mop and water. Allow to air dry. For badly soiled tile or grout lines, dilute this product with an equal amount of water (1:1 dilution) and apply to surface. Agitate with a mop or scrub brush, allow 3-5 minutes for detergent to dissolve soils, then rinse completely with clean water. Repeat as necessary.

### Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's may be downloaded from [www.crown-chem.com](http://www.crown-chem.com).

### Technical Specifications

Appearance	Pink Liquid
Odor	Cherry
pH (1% solution, 22°C)	<2.0
Foaming	Very High
Flash Point	None
Bulk Density (lbs/gal, 22°C)	9.24±0.1
Stability Range	50-100°F
Free Alkalinity (as Na <sub>2</sub> O)	None
Solubility (in H <sub>2</sub> O, 22°C)	100%
Acid Type(s)	Phosphoric

### Product Number

89205  
89215  
89230  
89255

### Packaging

5 gal. pail  
15 gal. drum  
30 gal. drum  
55 gal. drum
