

HSR™

High Solids Rinse Additive for Institutional Warewashing

A premium quality rinse additive/drying agent formulated for use in high temperature commercial dishwashing machines. Designed for use in areas with high levels of dissolved solids in the water. Assures sparkling clean results and fast drying where other rinse additives fail. Eliminates the need for towel drying, which is time consuming, contributes to dish breakage, and is a health code violation in most areas. Very low foaming when used correctly. Highly concentrated and economical to use.

Directions for Use

This product is designed to be dispensed with equipment installed and/or approved by your Service Representative. Inject in to the final rinse water of the dishmachine at a concentration of 50-100 ppm, depending on operating conditions. The amount required and the rinsing and drying performance will be affected by water hardness, rinse water temperatures and the dish machine's mechanical action. Water temperatures should be at least 140°F for best results, preferably higher. Your Service Representative will review these factors and make adjustments as needed to produce good results.

Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's can be downloaded from www.crown-chem.com.

Technical Specifications

Appearance	Blue Liquid
Odor	Characteristic
pH (1% solution, 22°C)	<7.0
Foaming (>43°C)	None
Flash Point	>200°F
Bulk Density (lbs/gal, 22°C)	9.125 ±0.1
Stability Range	40-100°F
Alkalinity (as Na ₂ O)	None
Solubility (in H ₂ O, 22°C)	100%
Phosphate Content (as P)	None

Product Number

15141
15105

Packaging

4x1 gal. case
5 gal. pail
