

OXYBRIGHT™

Oxygen Stain Remover for Kitchens, Laundry and Hard Surfaces

This product is an oxygen releasing compound formulated to remove stains from china and plasticware in restaurants, cafeterias and institutional kitchens. Effective on tea, coffee, cola and food soil stains from coffee cups, coffee makers and urns, plates, bowls, and plastic kitchen ware and utensils. May be used as a presoaking solution prior to machine or manual dishwashing, or as an additive in the dishmachine itself. Also an effective stain remover and deodorizer for laundry, carpeting and hard surface cleaning.

Directions for Use

For coffee cups, plates, bowls, plastic kitchenware and plastic utensils: Dissolve 1-2 ounces of this product per gallon of warm water. Soak items in solution for 10 minutes or longer if needed to remove stains (overnight if necessary). Wash in dishmachine or three compartment sink to rinse and sanitize.

For coffee makers: Dissolve 1-2 ounces per gallon of warm water. Circulate solution through coffee maker for 10 -15 minutes, then rinse with clean water.

For coffee urns: Dilute 1 ounce per gallon of warm water, then pour solution into urn and allow to soak for 10 minutes or as long as required to remove stains. Remove solution and rinse with clean water.

Laundry booster: Add approximately 2-4 ounces to a standard wash load for improved color-safe whitening and brightening of all fabrics.

Removing stains from carpeting and upholstery: Prepare a ready-to-use solution by dissolving ½-1 ounce in a quart of hot water. Test for colorfastness by applying solution to an inconspicuous area and allowing to dry. Blot (do not wipe) stain to remove excess. Apply solution to stain and allow to stand for 10 -30 minutes. Rinse with fresh water, then blot up excess liquid.

Cleaning hard surfaces: Dissolve ½-1 ounce per quart of hot water. Apply solution to surface to be cleaned, let stand 10-30 minutes, then rinse completely with clean water. To clean and brighten tile and grout, add a small amount of water to this product to create a paste. Apply to surface, let stand for 30-60 minutes, then rinse completely with clean water.

Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's may be downloaded from www.crown-chem.com.

Technical Specifications

Appearance	White Powder
Odor	Characteristic
pH (1% solution, 22°C)	>10.0
Foaming	Moderate
Flash Point	N/A
Bulk Density (lbs/gal, 22°C)	9.00 ±0.1
Stability Range	30-100°F
Free Alkalinity (as Na ₂ O)	Medium
Solubility (in H ₂ O, 22°C)	100%
Phosphate Content (as P)	<10%

Product Number

11828

Packaging

2x8 lb. case*

*Scoop included in each bottle
