SHINE-ON-LINE™

Premium-Quality Thickened High-Gloss Silicone Tire Dressing for In-Line Application in Tunnel Car Washes

A premium quality, thickened silicone finish coat designed especially for online application onto tires in automatic car washes. Imparts a glossy, long-lasting shine that resists water. Thickened formula reduces “sling” onto auto exterior surfaces. Suitable for use through most online application systems. Not recommended for auto interiors.

Directions for Use

Automatic Car Washes: Clean tire first using an alkaline tire cleaner. Rinse completely. Apply this product at the end of the tunnel just before drying. Follow manufacturers recommended settings for application equipment.

Manual Use: Clean tire completely using a high-quality tire cleaner. Assure that tire is completely dry before applying this product. Apply using a tire dressing applicator, dense sponge, or foam brush. Apply to outer wall of tire making sure to cover completely. Avoid contact with car. Wipe in a circular motion to spread out product and cover completely. Thickened formula will coat evenly and last longer, but may require additional effort to fill all tire crevices. Allow to dry. Not recommended for spray application.

Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's may be downloaded from www.crown-chem.com.

Technical Specifications

Appearance	Blue Liquid
Odor	Cherry
pH (1% solution, 22°C)	N/A
Foaming	None
Flash Point	>74°F
Bulk Density (lbs/gal, 22°C)	6.76±0.1
Stability Range	30-100°F
Free Alkalinity (as Na ₂ O)	None
Solubility (in H ₂ O, 22°C)	Insoluble
Phosphate Content	None
